**NEW IN  
BOTANIKA.**

## Exploring with a companion

### More diverse, more digital, more accessible.

Another door to botanika is now opening. Equipped with a smartphone or tablet, you can choose your expert “digital companion” according to your own interests.

Would you rather follow the tropical butterflies with the butterfly researcher, get to know our chameleon with an animal keeper or accompany a pilgrim on his trip through the Asian cultures? The choice is yours!

You can find the prices for the trails and a wealth of other information on our website at [www.botanika-bremen.de](http://www.botanika-bremen.de)

# WWW. BOTANIKA- BREMEN. DE

## How to reach us

Using public transport: From Bremen Central Station, take the no. 4 tram in the direction of Borgfeld/Lilienthal. At the Horner Kirche or Bürgermeister-Spitta-Allee stop, you can change to the no. 31 bus and continue to the Rhododendron-Park stop (main entrance). All stops are just a short walk away from botanika. There are car parking spaces available in Deliusweg and Marcusallee. The school car park in Ronzelenstraße may also be used on weekends and public holidays. In addition, botanika is also easy to reach by bike.

### botanika – Bremen’s world of nature discovery

With the kind support of: 

This project is being funded as part of the Union’s response to the COVID-19 pandemic.

# botanika

Bremen’s world of nature discovery

## On nature's trail

**Always different and new.** Immerse yourself in the diversity of nature. Discover Asian landscapes and cultures, experience a rainforest atmosphere up close and uncover the secrets of natural phenomena from the plant and animal kingdoms. A unique journey of discovery for young and old alike.

# BOTANIKA.

## botanika – an experience for everyone

**Welcome!** Adults and children, with or without wheelchairs, seeing or blind, deaf or hearing, interested in reading or preferring hands-on experiences – everyone is different and each is free to discover botanika in their own way.

## From floral splendour to super power

**Beautiful and wonderfully useful.** Colourful blooms, intense fragrances and optimal adaptation to their habitat. Plants are fascinating at first sight – and even more so at second. What tricks and strategies do plants employ to ensure their survival? How do humans make use of plants? Discover the secrets of the plant world!

## Rhododendrons by the thousand

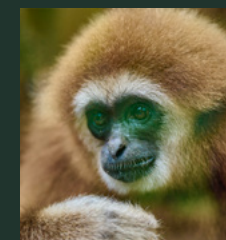

**A celebration of variety.** Marvel at the world's largest collection of rhododendrons. There are around 650 wild species and 3,500 varieties of the diverse flowering shrubs growing in botanika and the Rhododendron-Park.

## ZEN. SATIATION

*The Nirvana Buddha – the largest reclining Buddha cast in bronze outside of Asia*

*Our white-handed gibbons – ambassadors for species conservation*

## From animal encounters to species conservation

**Flying, swinging and swimming.** Hundreds of exotic butterflies flutter through our tropical greenhouse having just emerged from their pupae. Right next door, the white-handed gibbons swing deftly from branch to branch. And how loud are the calls of the free-flying myna birds?

It's much quieter among the clown fish on the coral reef. Encounter fascinating creatures, understand their world and find out why it is worth protecting them.
